Revised Scope Proposal

Presented to:

Law School Expert

Prepared for:

Ann Levine, Principal

Proposal Date: March 2026 | Supersedes proposal dated 6/19/2024

Where We Are

Over the past nine months, we've completed a comprehensive SEO campaign for LawSchoolExpert.com that included a full site audit, competitor analysis, keyword research, content strategy development, and the creation of SEO-optimized articles — all of which were reviewed and approved by Ann.

During the most recent phase, our technical audit uncovered several critical issues that explain why organic traffic has not been converting at the rate it should:

- **Security breach:** 20+ spam pages were injected by an unauthorized WordPress user, which we identified and are coordinating with the site developer to remove.
- **Contact information errors:** Three different phone numbers were appearing across the site, meaning potential clients calling from Google were reaching the wrong number.
- **Content cannibalization:** 36 pages competing for “personal statement” keywords, 81 pages competing for “LSAT” keywords, and similar duplication across low GPA, waitlist, and other core topics — causing Google to suppress rankings across the board.
- **Outdated content:** The site's #1 page by impressions (61,000+ per quarter) was still referencing 2014 client data.

These issues — now identified and documented — represent the highest-impact fixes available. The work ahead is execution: implementing the redirect plan, publishing optimized content, and monitoring results.

Proposed Scope: SEO Essentials

Up to 20 hours of dedicated work from our SEO team each month, focused on the activities that will move the needle most for Law School Expert at this stage of the project.

Monthly Deliverables

Content Production

- 2 SEO-optimized articles per month (up to 3,000 words total), written in Ann's voice, with AI image prompts and internal linking
- 1 existing article refresh per month — updating high-traffic pages with current data, improved titles, and optimized meta descriptions

On-Page Optimization

- Title tag and meta description optimization for up to 5 pages per month, prioritized by impression volume and CTR opportunity
- Internal linking improvements across published articles

Content Consolidation & Redirect Management

- Ongoing implementation of the redirect plan to resolve content cannibalization
- Monitoring redirect performance and adjusting as needed
- Coordination with the site developer on technical items requiring server access

Monthly Reporting

- Google Search Console performance summary: impressions, clicks, CTR, and average position for priority keywords
- Progress update on redirect implementation and content consolidation
- Recommendations for the following month's priorities

What's Not Included

To keep this plan focused and affordable, the following items from the previous scope are not included in this package:

- Backlink building / off-page SEO campaigns
- Competitor audit updates
- Schema markup implementation (can be added as a one-time project)
- Video production plans and lead magnet specifications
- Conversion optimization and tracking setup
- Ongoing technical site fixes beyond redirect management (these should be handled by the site developer)

Any of these can be added as one-time projects at an agreed-upon rate if needed.

Why This Scope Makes Sense Right Now

The audit phase is complete. The strategy is defined. The redirect map is built. What the site needs now is consistent execution — new content that consolidates authority, technical fixes that stop Google from getting confused, and regular monitoring to measure progress.

This plan is designed to deliver visible, measurable results within the first 60 days:

Immediate (Month 1): Complete redirect implementation for top cannibalization clusters, publish 2 new articles, optimize titles/metatags on top 5 pages by impressions.

Short-term (Month 2–3): Measurable CTR improvement on optimized pages, traffic lift from consolidated content authority, new articles ranking for target keywords.

Ongoing: Sustained organic traffic growth through regular content production and optimization.

What We've Accomplished Together

For context, here is a summary of work completed under the previous scope:

Content Created

- 12 SEO-optimized articles written, reviewed by Ann, and published (Articles 1–9 published; Articles 10, 11, 12 in review)
- Each article includes keyword targeting, internal linking, AI image prompts, and meta data

Technical Work Completed

- Full site audit with Google Search Console and Google Analytics analysis
- Identified and documented security breach (20+ spam pages)
- Built comprehensive redirect map for 50+ pages
- Identified 37 broken (404) pages with redirect recommendations
- Documented three incorrect phone numbers across the site
- Identified and flagged Lorem Ipsum placeholder content, outdated copyright, and defunct staff references
- Coverage/indexing analysis: identified 1,138 pages Google has discovered but not indexed, with categorization and prioritization

Strategy Documents Delivered

- Complete SEO audit and task plan (prioritized by tier)
- Issues and redirect map with exact FROM → TO URL mapping
- Content cannibalization analysis with consolidation strategy
- All communications to site developer (Chase) drafted and ready

Next Steps

1. Review and accept this revised proposal
2. We'll begin Month 1 execution immediately, starting with the redirect plan and the two articles currently in Ann's review queue
3. Monthly reporting will be delivered by the 5th of each month covering the previous month's performance

We look forward to continuing our work together!
